URmove Ticketing App

The white label app for jumpstarting your mobile ticket sales

Finding tickets with ease, paying cash-free, and off they go: With the URmove Ticketing App, you can offer your customers a modern mobile ticketing service that adopts your transport company's corporate branding. The app is integrated quickly and cost-effectively into your sales infrastructure and provides you with access to bookings, sales figures and reports in the backend at any time.
The URmove Ticketing App is the ideal platform for mobile ticket sales, and it scales flexibly to meet your needs. Additional mobility services, such as carsharing, ondemand offers or parking tickets, can be integrated at any time.

Improved passenger comfort. Better transparency for you.

- **Ticket purchase made simple**
  All tickets are available directly in the app, and the Deutschlandticket can also be placed in the wallet.
- **Travel in comfort by public transport**
  Map view and connection information, including real-time data, allow customers to always take the fastest route.
- **Direct communication with customers**
  Stay in touch with your customers using push notifications.
- **Perfect customer support and real-time sales insights**
  The built-in service portal provides fast and easy access to support, statistics, and sales figures.

URmove Ticketing App

One app – The full range of tickets

The right public transport ticket for everyone
From single tickets and multi-journey tickets to monthly passes – make your entire range of tickets for your region available as a mobile service. The Deutschlandticket can be added to the wallet as well.

Popular payment methods seamlessly integrated
By default, all standard payment methods are available: direct debit, credit card, PayPal, Google Pay and Apple Pay – for a secure, convenient and fast purchasing process for you and your customers.

Targeted use of vouchers
Boost customer loyalty and reward your customers with vouchers and discount codes (e.g. for marketing campaigns, prize draws or discounted tickets). These are available as a single-use or multi-use code.

Customer communication and support in one platform
There's a sudden disruption on the route, or you are launching a special marketing campaign for your customers? Use push notifications to communicate service updates and marketing campaigns, while the integrated built-in service portal enables efficient customer support, ticket management, and sales reporting.

Your app, your design
Thanks to the white label approach, you will receive a mobility app that can be fully tailored to your corporate design in no time at all and without any additional development work. Better yet, you benefit from an accessible solution that meets all WCAG 2.1 A and AA requirements, meaning it is accessible to all user groups.

Your entry point for digital, multimodal sales
The URmove Ticketing App provides the ideal foundation for digitising your sales operations. Start using the key features and expand the app flexibly as your needs grow. Additional mobility services, such as carsharing, ondemand offers or parking tickets, as well as account-based ticketing, can be integrated at any time.
